- **AND MORE!**

Aydin's Academy
Education, *Elevated.*

PROGRAM COMPONENTS

Academic Course Selection Assistance

Having a balanced and focused schedule that is both manageable and shows rigor is important. We provide advising on the class selection that best achieves your goals through high school.

Aydin's Academy Study Skills Course

[Complimentary: \$2000 savings!]

College counseling is about improving students, not just advising them. The bi-yearly Study Skills Course is complimentary for high schools students. The curriculum covers speed reading and comprehension, note-taking, test-taking skills, how to study effectively for each individual class, and memorization skills. The goal is to give students the necessary skills to thrive.

Advising for College Fairs and Events

Universities often have informational events to help familiarize students with their unique programs and the pros of their universities.

Advising on Internships and Research

Many internships and research opportunities do little to expose students to the reality of the field they are interested in. Additionally some internship and researching opportunities are more meaningful to universities than others. We ensure students get the most growth from their volunteering/research experience.

Athletic Advising

Advice on sports scholarship processes, admission statistics, tryouts, open-field days and more. Use your sport to boost admission odds!

Mock College Interviews

It is recommended for certain universities to interview so the school can get a genuine glimpse at your personality. We provide coaching and preparation to make sure the interview highlights both your strengths and personality.

Grade Monitoring

Being a parent is a busy job, monitoring grades shouldn't be too. Aydin's Academy closely monitors grades to keep students on-track.

Advising on Emerging Markets and Careers

Advising on different fields, specialties within fields, emerging markets, and the requirements (both academic and beyond) for pursuing those fields.

National/International College Guidance

Our college matching process goes beyond GPA, SAT, and ACT scores. We build a complete profile of students and match students from national to international schools. Other factors included in our matching include athletics, extracurriculars, student body size and culture, internship opportunities, study abroad opportunities, and much more.

College Application Essay and Portal Advising

Students are walked through the application process and college essay writing. Our essay advising and editing goes for unlimited hours: until the essays are perfect for submission. Student essays are tailored specifically to applied universities to maximize acceptance chances.

Scholarship Matching / Financial Advising

Ensure that dream schools are not financially out of reach. Aydin's Academy matches students with the scholarships they are likely to be awarded. We also guide students through the application and essay writing process. Aydin's Academy students are awarded 20-80k in scholarships on average!

Career Counseling

Going to a prestigious school does not mean much unless you make the most of it. We provide counseling on internship, research, job, and opportunities available at the school, minors, and any program to make the most out of a college experience.

1-on-1 Project Guidance – A Step Above

Students must set themselves apart from the rest. This means a student must create, build, or make a change that no other student would normally do. We provide coaching on projects that differentiate students from their peers.

[100+ HOURS]
